DressApp — Easy User Guide & Manual

Welcome to **DressApp**, your personal AI fashion assistant and smart digital wardrobe! This easy-to-follow guide walks you through every feature step by step so you can organize your clothes, get smart daily outfit ideas, shop smarter, and make the most of your closet.

Whether you are using DressApp on the web at dressapp.co or on your mobile device, this manual will help you look your best every day with zero stress.

---

1. Getting Started

What is DressApp?

DressApp turns your physical closet into an intelligent digital wardrobe right on your phone or computer. With DressApp, you can:

- **Snap photos** of your clothes to automatically crop out backgrounds, complete cut-off pieces, and tag items.
- **Group tag** multiple clothes at once to organize seasons and styles in seconds.
- **Get personalized daily outfit suggestions** tailored to your local weather, calendar schedule, and personal style.
- **Try on outfits virtually** on a customizable 2D mannequin or a photo of your own body.
- **Discover daily fashion trends** with Trend Scout and instantly style them using clothes you already own.
- **Track your wardrobe value & Cost-Per-Wear** to see which clothes give you the best value.
- **Pack for trips** with the AI Suitcase Assistant so you never overpack or forget an outfit.
- **Scan Digital Product Passports (DPP)** on retail tags to verify eco-friendly materials and garment care.
- **Buy, sell, swap, or rent clothes** directly with other fashion lovers in the circular marketplace.
- **Shop online with confidence** using our Shopping Assistant browser extension to get recommended sizes automatically.

Basic Setup & Permissions

1. **Open the App**: Visit https://dressapp.co in Google Chrome or Apple Safari, or open the DressApp mobile app on iOS/Android.
2. **Grant Helpful Permissions**: **Camera**: Allows you to take photos of your clothes and scan DPP QR codes on tags. **Microphone**: Allows you to talk to your AI Stylist hands-free. **Location**: Allows DressApp to check your local temperature and weather for accurate outfit styling.
3. **Zero Technical Setup Required**: You do NOT need to configure any API keys or technical accounts to start styling! Every account comes ready-to-use with DressApp's built-in AI Stylist and 10 free daily styling credits.

---

2. Step-by-Step Instructions

Step 1: Adding Clothes to Your Closet

Adding garments to your digital closet takes just a few seconds. Choose whichever method is easiest for you:

1. Tap **Add Item** from the navigation bar.
2. Choose **Take Photo** to snap a picture, or choose **Upload Photos** from your gallery. **Mix & Match Freely**: You can upload multiple photos of completely different types in the same batch—a photo of one sweater, a full-body mirror selfie, and a flat-lay pile of several clothes on your bed—without picking any mode tabs!
3. **Instant Duplicate Check**: The app quickly checks if you already added the same garment so you never duplicate items by accident.
4. **Automatic 3-Pipeline Photo Routing**: **Single Garment**: Cleanly removes the background from an individual item. **Full Outfit on a Person or Mannequin**: Automatically detects and splits the top, pants/skirt, jacket, shoes, and accessories into separate cards. **Group / Pile of Clothes (Mass Cluster)**: Automatically separates multiple unworn garments laid out side-by-side or hanging on wall hooks into individual closet items.
5. **Smart Tagging (Sweatshirts, Hoodies & Cultural Attire)**: DressApp automatically tags colors, fabrics, seasons, and categories—accurately distinguishing **Sweatshirts & Hoodies** from T-shirts and recognizing 60+ **Traditional & Cultural** garments (Sari, Kimono, Thobe, Kaftan, Hanbok, Cheongsam, Ao Dai, Dirndl, Kilt, and more) in your language.
6. **AI Quality Checker & Automatic Image Completion**: **Pristine Items**: Clean photos have their background removed instantly into a crisp, transparent image. **Image Completion**: If parts of a garment are covered by your hands, a bag, or hair (or cut off by the camera frame), **Nano Banana** automatically completes the missing fabric symmetrically. **Studio Reconstruction**: If an item is severely cut off (like a photo where only the toe of a shoe is visible), the AI reconstructs the full item into a clean studio catalog photo.
7. Tap **Save** to add the items to your closet!

1. Tap **Scan QR (DPP)** on the Add Item screen.
2. Point your camera at the QR code printed on your garment's retail tag.
3. The app instantly imports the brand name, exact fabric composition, washing instructions, and sustainability score.

1. Tap **Add Item** and switch to the **Digital Import** tab.
2. Choose how you want to provide your receipt: **Paste Text**: Paste the order confirmation text from your email. **Upload File**: Upload an invoice image, screenshot, or store PDF (e.g. from Zara, ASOS, or H&M). **Web Link**: Paste the web link to your order confirmation page.
3. **Interactive Box Selection**: If your receipt image shows multiple items, simply draw boxes over each item to crop them out one by one.
4. Tap **Extract Selected Items**. The AI reads the brand, price, purchase date, and size.
5. **Receipt-Locked Protection**: Purchase details imported from receipts are safely locked (`from_receipt: true`). Even if you re-take a photo later, the verified price and brand will never be accidentally overwritten.

1. Open any garment from your closet to view the **Item Details** editor.
2. Scroll to the **Re-analyse Photo & AI Eyes Assistant** section.

3. **Chat or Dictate Your Wishes**: Type or speak instructions using natural words: *"Remove the shoes from the crop" "Complete the sleeve where the hand was" "Remove the metal studs from the jacket" "Change the fabric texture to smooth silk"*
4. **1-Tap Quick Starter Chips**: Tap handy chips like ■ *Remove shoes*, ✂■ *Complete hole*, ■ *Remove studs*, or ■ *Refine fabric*.
5. **Instant Preview**: **Nano Banana** creates a clean, photorealistic image right inside the chat.
6. Tap **Apply as garment photo** and hit **Save** to keep your fresh look!

Step 2: Organizing Your Wardrobe & Group Tagging

Have dozens of clothes you want to organize at once? Group Tagging makes bulk wardrobe management effortless:

1. Open your **Closet** tab.
2. Tap the **Select / Batch Edit** button in the top toolbar to turn on multi-select mode.
3. Tap the items you want to update (or tap a category chip like *"Select all Tops"*).
4. Tap the floating **Group Tag** button at the bottom.
5. Select the attributes you want to apply to all selected items at once: **Seasons**: Spring, Summer, Fall, Winter. **Formality & Occasions**: Casual, Smart Casual, Business, Formal, Athletic, Loungewear, Traditional. **Custom Tags**: Type custom labels (such as *"Vacation"*, *"Office Wear"*, or *"Weekend"*).
6. Tap **Apply to Selected Items**. Your closet grid updates immediately!

Step 3: Talking to Your AI Stylist

Need advice on what to wear for a meeting, a date, or unpredictable weather? Your AI Stylist is always ready to talk:

1. Tap **AI Stylist** in the bottom menu.
2. Tap the **Microphone icon** and speak out loud, or type your question: *"What should I wear for a rainy outdoor lunch today?" "Put together a chic casual outfit featuring my white sneakers." "I have an important business presentation at 2 PM. What looks best?"*
3. The AI Stylist checks your local weather, your Google Calendar schedule, your saved style preferences, and your closet inventory.
4. The stylist responds with personalized outfit proposals and speaks the answer back to you in a warm, natural voice.
5. **Built-in Multi-Tier AI & Safe Quota Fallback**: Every account works out of the box with zero API keys required! Free Tier accounts use DressApp's built-in **Eyes** engine (`Qwen 2.5 VL 3B`), while **Manager** ($10/mo) and **Professional** ($15/mo) plans use the ultra-fast **Google Gemini 3.5 Flash** cloud model with automatic fallback to our built-in assistant (*"Using Platform Stylist"*) if cloud traffic is high—so your conversation never fails!
6. Tap **Play reply** anytime to hear the advice spoken again.

Step 4: Setting Up Your Profile & Body Avatar

Tailor your experience to your unique body shape and style preferences:

1. Go to your **Profile** page (`/me`).
2. **Language & Voice**: Select your preferred language (DressApp supports **13 languages** including English, Spanish, French, German, Italian, Portuguese, Japanese, Hebrew, and Arabic with automatic right-to-left layout) and pick your favorite stylist voice.
3. **Photos & Body Avatar**: Upload a full-body photo for realistic try-ons, or use the dynamic 2D vector mannequin. Select your exact skin tone from the interactive color palette. Tap **Remove Photo** anytime to switch back to the mannequin.
4. **Automatic Body Sizing Predictor (ANSUR II)**: Enter just 4 simple measurements: **Height**, **Weight**, **Waist**, and **Foot Length**. DressApp automatically calculates your shoulder width, chest, hips, sleeve length, and inseam. It also auto-fills standard retail clothing sizes: **Shirt Size** (XS–3XL), **Pants Size** (waist inches), **Shoe Size** (US & EU), and **Dress/Bra Size** for women.
5. **Style & Modesty Preferences**: Set your favorite colors, preferred aesthetics, and modesty comfort level (*Casual/Relaxed*, *Moderate*, *Conservative*).
6. **Google Calendar Connection**: Connect your Google account so the AI Stylist knows when you have weddings, flights, or gym sessions planned.

Step 5: Planning Outfits & Virtual Try-On

See how clothes look together before taking them off the hanger:

1. Open the **Outfit Canvas** tab.
2. **Layer Clothes Seamlessly**: Mix and match tops, bottoms, outerwear, shoes, and accessories on your 2D avatar.
3. **Outerwear Layering ("With / Without Outerwear")**: Toggle between seeing your outfit with a coat or jacket on top, and seeing the underlying top and bottoms when you take the jacket off.
4. **Interactive Garments**: Tap any garment directly on your avatar to open its details or swap it for another piece.
5. **Compatibility Scores**: View real-time scores for color harmony, pattern balance, weather comfort, and event appropriateness.
6. Tap **Save to Diary** to save your favorite combinations for future wear.

Step 6: Wardrobe Insights & Cost-Per-Wear

Learn what you actually wear and make smarter shopping decisions:

1. Tap **Wardrobe Insights** in the navigation menu.
2. **Total Wardrobe Value**: See the total estimated value of all clothes in your digital closet.
3. **Cost-Per-Wear (CPW)**: Every time you wear an outfit, log it in your diary. DressApp calculates: $$\text{Cost Per Wear} = \frac{\text{Purchase Price}}{\text{Number of Times Worn}}$$ Watch your

investment garments become more cost-effective each time you wear them!

4. **Efficiency Leaderboard**: Discover your most-worn wardrobe champions and identify neglected pieces that you can sell, swap, or donate.
5. **Color & Category Breakdown**: Explore interactive visual charts showing your wardrobe's dominant colors and category distributions.

Step 7: Suitcase Packing Assistant

Take the stress out of packing for vacations and business trips:

1. Tap **Suitcase** in the menu and tap **New Trip**.
2. Enter your destination city, departure date, return date, and primary activities (e.g. *"Beach, dining out, and walking"*).
3. The AI assistant fetches the destination forecast and builds a complete packing checklist and daily outfit schedule from your closet.
4. **Refine via Chat**: Ask for tweaks in plain language (e.g., *"Add a formal dress for Saturday night"* or *"I prefer flat shoes only"*).
5. Tap **Approve Suitcase** to save your checklist. Check off items on your phone as you place them into your luggage!

Step 8: Daily Scheduler & Morning Push Notifications

Wake up every morning to a ready-to-wear outfit suggestion:

1. Open **Profile** -> **Scheduler & Push**.
2. Turn on daily morning proposals.
3. Pick your preferred delivery time (e.g., 07:00 AM) and your desired style focus (*Casual*, *Smart Casual*, *Business*, *Athletic*).
4. Every morning, you will receive a push notification on your device with 3 personalized outfit ideas matched to today's weather!

Step 9: Trend Scout & "Style with My Closet"

Stay ahead of global fashion trends without spending a fortune on new clothes:

1. Open the **Trend Scout** section from your home feed or navigation bar.
2. **Switch Between Women's and Men's Fashion**: Use the top toggle to instantly view trends tailored to women's or men's style aesthetics.
3. Browse 7 curated daily and monthly channels: ■ **Local News**: Emerging designers, local fashion weeks, and boutique events happening in your home region. ■ **Runway**: Haute couture, seasonal fashion week highlights, and directional designer looks. ■ **Street Style**: Urban fashion, sneaker drops, and modern casual street wear. ■ **Sustainability**: Eco-friendly textiles, zero-waste clothing care, and

conscious brands. ■ **Influencers & Icons**: Viral fashion movements (quiet luxury, old money, Y2K) and celebrity red-carpet breakdowns. ■■ **Vintage / Archival**: Timeless archival pieces, thrift style, and vintage denim curation (strictly non-commercial). ■ **Care & Repairs**: Step-by-step easy guides for mending, removing sweater fuzz, sneaker care, and making your clothes last longer.

4. **1-Tap "Style with My Closet"**: See a trend you love? Tap **Style with My Closet** on any trend card! The AI Stylist immediately searches your existing closet for matching colors, silhouettes, and fabrics to recreate that trend using clothes you already own.
5. **Clean & Safe Reading**: Every trend is rigorously filtered to eliminate shopping carts, ads, and paid sponsor walls, keeping your inspiration pure and creative.

Step 10: Circular Fashion Marketplace

Declutter your closet or discover pre-loved fashion from other members:

1. **List an Item**: Open any garment in your closet, tap **Edit Intent**, and choose *For Sale*, *Rent*, *Swap*, or *Donate*. Set your desired price or rental tariff.
2. **Virtual Try-On Sandbox**: Before buying an item from another user, tap **Try in Sandbox** to test-fit their garment directly onto your avatar alongside your existing clothes!
3. **Safe Checkout**: Buy items securely using PayPal checkout buttons. DressApp charges a simple 7% platform fee on completed sales to ensure buyer and seller protection.

Step 11: Import Your Wardrobe from Other Apps (Desktop)

Already have your wardrobe saved in another app? Don't re-photograph everything!

1. Open your **Profile** page on your desktop computer and click **Import Wardrobe**.
2. Select the app you're coming from (e.g. **Whering**, **Acloset**, **Stylebook**, **Smartli**, **BeautyAI**, or any other).
3. Drag the **"Share & Start Agent"** bookmarklet to your browser's bookmarks bar.
4. Log into your competitor account, open your wardrobe view, and click the bookmarklet.
5. The agent scrolls through your clothes, captures the images, and transfers them into DressApp automatically!
6. Each item is automatically categorized, tagged, and matted by our AI.

Step 12: Shopping Assistant Browser Extension

Never buy the wrong size online again!

1. Install the **DressApp Shopping Assistant** from dressapp.co/extension/connect or add the mobile shopping bookmarklet.
2. When shopping on stores like **SHEIN**, **AliExpress**, **Zara**, **ASOS**, or **H&M**, click the floating **DressApp Size** button on any product page.

3. The extension reads the store's size chart, compares it to your saved body measurements, and recommends your best-fitting size with confidence scores.
4. If a size chart is hidden, use the **Drag Box** tool to outline the chart manually.

Step 13: Subscriptions, Credit Packs & Local Payments

Understand your plan and manage your AI styling credits:

1. **Monetization Tiers**: **Free Tier ($0/month)**: Stores up to **50 closet garments** baseline (expandable up to 150 via referral bonuses), powered by DressApp's built-in **Eyes** AI (`Qwen 2.5 VL 3B`) with full access to styling and marketplace features. Includes **10 free daily AI credits** (which refresh every 24 hours and have a 30-day lifespan). **Manager Plan ($10/month)**: Upgrades you to **unlimited closet storage**, priority cloud AI processing (**Google Gemini 3.5 Flash**), and monthly bonus credits. **Professional / Expert Plan ($15/month)**: Designed for power users, professional stylists, and local tailors—including unlimited closet storage, priority cloud AI (**Google Gemini 3.5 Flash**), directory listings, and promotional campaign tools.
2. **Viral Referral Bonus**: On the free plan, invite friends using your unique referral link found under **Profile -> Invite Friends**. Every friend who signs up gives you **+10 bonus closet slots** for free (up to 150 items max)!
3. **Prepaid Credit Packs (Paid Credits Never Expire)**: Need extra AI credits for heavy styling or photo inpainting? Purchase packs anytime: **10 credits**: $1.99 (or 10.00 ILS) **25 credits**: $3.99 (or 25.00 ILS) **50 credits**: $7.99 (or 50.00 ILS) **100 credits**: $15.99 (or 55.00 ILS) **Smart Credit Spending**: The system always spends your oldest soonest-expiring free daily credits first, protecting your permanent paid credits!
4. **Localized Israeli Payments (Atzmai Gateway)**: For users in Israel, pay conveniently in ILS using **Bit** or Israeli credit cards with automated tax invoice delivery to your email.

Step 14: Administrator Panel (For Store & Platform Managers)

If your account has administrative permissions:

- Open `/admin` to view platform health metrics, active user registrations, total items matted, and marketplace transactions.
- Easily review and moderate community listings to keep the marketplace safe and stylish.

---

3. What to Expect (Expected Results)

- **Effortless Mixed-Batch Uploads**: Upload single items, full outfits, and piles of clothes together—each photo automatically routes to the right pipeline and produces clean, transparent studio cutouts.
- **Natural Voice Conversations**: The AI Stylist answers your voice questions promptly in clear, friendly speech.

- **Accurate Recommendations**: Suggestions reflect real local weather and your real closet contents—no hallucinated clothes you don't own!
- **Accurate Sizing**: The 4-measurement predictor saves you time and accurately identifies your retail sizes across international brands.
- **Zero Loss of Receipt Details**: Important purchase receipts stay locked and safe while letting you edit images freely.

---

4. Quick Troubleshooting & Tips

- **"Using Platform Stylist (Quota Fallback)" Notice**: If the cloud AI hits a temporary rate limit, DressApp automatically answers using our built-in on-premises **Eyes** engine so your chat never crashes!
- **"Closet Limit Reached"**: Free accounts hold 50 items baseline (up to 150 with referrals). You can invite friends to gain +10 free slots per signup, or upgrade to the **Manager** ($10/mo) or **Professional** ($15/mo) plan for unlimited storage.
- **Microphone or Voice Typing Not Responding**: Ensure microphone permissions are enabled in your browser or device settings. In Chrome, click the lock icon in the address bar to check permissions.
- **Background Removal Quality**: For the crispest cutout, photograph clothes against a contrasting surface (like a plain bedsheet, wood floor, or light wall) with good lighting.
- **Wardrobe Import Stalling?** Competitor wardrobe import works best on desktop computers in Google Chrome. Ensure the competitor closet page is scrolled so items are visible.
- **Size Recommendation Not Showing?** Click the DressApp extension icon and make sure your DressApp account is connected with your body measurements filled out.

---

5. Helpful Limitations to Keep in Mind

- **Free Tier Capacity**: Baseline storage is 50 garments (up to 150 items with referrals). To store more, invite friends or activate a Manager or Professional subscription.
- **Daily Free Credits**: The 10 daily free AI credits expire after 30 days if unused. Purchased credit packs never expire.
- **Desktop Requirement for Bookmarklet**: The competitor wardrobe migration bookmarklet requires desktop browser bookmark capabilities and cannot run inside mobile phone browsers.
- **Receipt OCR Quality**: When taking photos of physical paper receipts, ensure the text is well-lit, flat, and legible for optimal brand and price extraction.
