

DressApp — Easy User Guide & Manual

Welcome to **DressApp**, your personal AI fashion assistant and digital wardrobe manager! This simple guide walks you through every feature step by step so you can organize your clothes, get smart daily outfit ideas, and make the most of your closet.

1. Getting Started

What is DressApp?

DressApp turns your real-world physical closet into a smart digital wardrobe on your phone or computer. With DressApp, you can:

- **Snap photos** of your clothes to automatically crop out backgrounds and tag items.
- **Get daily outfit suggestions** tailored to your weather, calendar events, and personal style.
- **Try on clothes virtually** on a customizable 2D avatar or your own body photo.
- **Scan Digital Product Passports (DPP)** on retail labels to verify eco-friendly materials and garment care.
- **Buy, sell, swap, or rent clothes** directly with other fashion lovers in the circular marketplace.

Basic Setup

1. **Open the App:** Visit <https://dressapp.co> on Google Chrome or Apple Safari.
 2. **Grant Permissions:** Allow **Camera** access to take photos of your clothes and scan QR tags. Allow **Microphone** access to talk to your AI Stylist hands-free. Allow **Location** access for accurate local weather and local stylist recommendations.
-

2. Step-by-Step Instructions

Step 1: Adding Clothes to Your Closet

Adding your wardrobe items to DressApp is fast and easy:

1. Tap **Add Item** from the bottom menu.
 2. Choose **Take Photo** to take a picture of your garment on a hanger or flat surface, or **Upload Photos** from your gallery.
 3. The app automatically checks if you already added the same item. If a duplicate is detected, you can skip or add it anyway.
 4. DressApp automatically removes the photo background and fills in details like color, category, fabric, and occasion.
 5. Tap **Save** to add the garment to your closet grid instantly.
-
1. Tap **Scan QR (DPP)** on the Add Item page.
 2. Scan the QR code printed on your garment's label.

3. The app imports brand details, fabric composition, washing instructions, and sustainability scores automatically.

1. Tap **Add Item** and open the **Digital Import** tab.
 2. Select how you want to import your receipt: **Paste Text**: Paste the confirmation text directly from your email. **Upload File**: Upload a receipt image, invoice screenshot, or a PDF file (like Zara or ASOS store invoices). **Web Link**: Paste the web link to your order confirmation page.
 3. **Select Individual Clothes**: If your receipt image lists multiple clothes, click and drag box selectors directly over each item to crop them out one by one.
 4. Tap **Extract Selected Items**. The AI will automatically read the brand name, price, purchase size, and category.
 5. **Receipt-Locked Fields**: Once saved, all commercial details from the receipt (like price, brand, and size) are locked. If you later upload a photo to update the clothing's thumbnail, these verified details will never be accidentally modified by the AI.
-

Step 2: Talking to Your AI Stylist

Need advice on what to wear today? Your AI Stylist is ready to chat:

1. Tap **AI Stylist** in the menu.
 2. Tap the **Microphone icon** and ask a question out loud, like: *"What should I wear for a rainy afternoon lunch?"* *"Suggest a casual outfit with my blue denim jacket."*
 3. The AI Stylist checks your local weather forecast, calendar schedule, and closet items, then speaks back to you with personalized outfit proposals!
 4. Tap **Play reply** to hear the stylist's voice again anytime.
-

Step 3: Setting Up Your Profile & Body Avatar

Personalize your virtual avatar and style preferences:

1. Go to **Profile (/me)**.
2. **Language & Voice**: Select your preferred language (12 supported languages including English, Spanish, French, Hebrew, and Arabic) and TTS voice profile.
3. **Photos & Avatar**: Upload a full-body photo for realistic try-ons, or use the dynamic 2D vector mannequin. Select your exact **Skin Tone** from the interactive color palette. Click **Remove Photo** anytime to instantly revert to the vector mannequin.
4. **Automatic Body Measurement & Sizing Predictor**: Enter just 4 basic numbers: **Height**, **Weight**, **Waist**, and **Foot Length**. DressApp automatically predicts your shoulders, chest, hip, sleeve, and inseam measurements. It also translates these metrics into recommended retail standard sizes: **Shirt Size**, **Pants Size**, **Shoe Size**, and **Dress/Bra Size** (for women), automatically pre-filling them in your profile.
5. **Style Profile**: Set your favorite aesthetics, preferred color palettes, and modesty preferences (*Casual/Relaxed*, *Moderate*, *Conservative*).

Step 4: Planning Outfits & Virtual Try-On

Preview and layer outfits before getting dressed:

1. Open **Outfit Canvas**.
 2. **2D Virtual Try-On**: See your top, bottom, outerwear, and shoes layered perfectly on your avatar.
 3. **Outerwear Layering**: View your outfit with a jacket layered on top ("With Outerwear") and see what's underneath ("Without Outerwear").
 4. **Interactive Details**: Tap any item on the avatar to view its details or edit its info.
 5. **Compatibility Score**: View harmony scores for color balance, pattern matching, weather suitability, and event appropriateness.
-

Step 5: Suitcase Packing Assistant

Never forget an item when traveling:

1. Tap **Suitcase** and enter your destination, trip dates, and planned activities.
 2. The AI assistant builds a complete packing list and daily outfit schedule based on destination weather.
 3. Use the chat box to request adjustments (e.g., "Add a formal dinner dress for night 2").
 4. Tap **Approve Suitcase** to save your trip packing list.
-

Step 6: Daily Scheduler & Push Notifications

Get morning outfit recommendations sent directly to your phone or computer:

1. Open **Profile** -> **Scheduler & Push**.
 2. Turn on daily proposals and choose your notification time (e.g., 07:00 AM).
 3. Select your preferred style focus (*Casual*, *Smart Casual*, *Formal*, *Athletic*).
 4. Every morning, you'll receive a push alert featuring 3 fresh outfit combinations from your wardrobe!
-

Step 7: Circular Fashion Marketplace

Buy, sell, trade, or rent pre-loved clothing:

1. **List an Item**: Open any garment in your closet, tap **Edit Intent**, and choose *For Sale*, *Rent*, *Swap*, or *Donate*.
2. **Try-On Sandbox**: Test-fit marketplace items directly on your avatar alongside your existing clothes before buying!
3. **Checkout**: Complete transactions securely using integrated PayPal checkout buttons.

Step 8: Import Your Wardrobe from Other Apps

Already have your clothes organized in another app? DressApp can import them automatically so you don't have to re-photograph everything!

Supported Apps:

- Whering
- Acloset
- Stylebook
- Smartli
- BeautyAI
- Or any other app (you can type the name)

1. **Open Profile:** Go to your Profile page and click the **"Import Wardrobe"** button.
 2. **Choose Your App:** Select your competitor app from the grid, or type in a custom app name.
 3. **Log In:** A new browser tab will open to your competitor's login page. Log in to your account there.
 4. **Install the Bookmarklet:** You'll see a "Share & Start Agent" button. Drag it to your browser's bookmarks bar (the bar below the address bar).
 5. **Go to Your Wardrobe:** In the competitor app, navigate to your wardrobe or closet view where all your clothes are displayed.
 6. **Start the Import:** Click the bookmarklet button you just installed.
 7. **Sit Back and Relax:** The agent will automatically: Scroll through your wardrobe Detect and capture each garment image Stream the captured items back to DressApp in batches
 8. **AI Does the Work:** Each captured garment is automatically analyzed by our AI Stylist, which identifies: What type of item it is (shirt, pants, dress, etc.) The colors The fabric/material The brand (if visible) What season and occasion it's best for How formal or casual it is
 9. **Review Your Items:** Once the import finishes, check your Closet tab to see all your newly imported items. You can edit any details as needed.
- **Desktop Only:** Wardrobe import only works on desktop computers (not phones or tablets). This is because it needs special browser features that aren't available on mobile.
 - **Keep DressApp Open:** Don't close the DressApp tab while the import is running. You can close the competitor app tab once the import starts.
 - **No Duplicates:** The system automatically detects and prevents importing the same item twice.
 - **Quality Control:** Items that can't be clearly identified (obscured images, non-clothing items) are automatically filtered out.
 - **Server-Side Processing:** Once the import starts, the AI analysis happens on our servers. Even if you close your browser, the analysis will continue.
 - **Bookmarklet not showing?** Make sure your bookmarks bar is visible. Press Ctrl+Shift+B (Windows) or Cmd+Shift+B (Mac) to show it.
 - **Items not appearing?** Try refreshing the competitor page and starting the bookmarklet again.
 - **Import stalls?** Check that all wardrobe items are fully visible in the browser window. The tool works best when it can see complete garment cards.

- **Need to re-analyze items?** Contact support and we can re-run the AI analysis on your imported items.
-

Step 9: Shopping Assistant Browser Extension

Never worry about picking the wrong size again! DressApp's Shopping Assistant works directly on popular stores like SHEIN, AliExpress, and more to give you personalized size recommendations.

When you're shopping online, the extension automatically:

- **Scans size charts** on product pages
- **Compares** the chart to your saved body measurements
- **Recommends** the perfect size for you with confidence scores

Option A: Chrome Extension (Recommended)

1. Visit dressapp.co/extension/connect
2. Click **"Connect to DressApp"** to link your account
3. The extension installs automatically in Chrome
4. Look for the DressApp icon in your browser toolbar

Option B: Mobile Bookmarklet

1. On your phone, go to your DressApp Profile page
 2. Find the **Shopping Assistant** section
 3. Copy the bookmarklet code
 4. Add it to your mobile browser's bookmarks
1. **Visit any supported store** (SHEIN, AliExpress, Zara, Asos, etc.)
 2. **Look for the DressApp button** - you'll see: A floating button in the bottom-left corner (* **DressApp**)
OR an inline button next to the size selector (* **DressApp size**)
 3. **Click the button** - the extension automatically: Scans the page for size charts Analyzes the chart using AI Shows your personalized size recommendation
 4. **See your result** - a card appears showing: Your recommended size (e.g., "Size 38") Confidence level (e.g., "90% confident") Which measurements matched (bust, waist, etc.) Alternative sizes if you prefer a looser or tighter fit

Sometimes size charts are hidden or in unusual formats. No problem!

1. Click the DressApp button
2. If no chart is found automatically, you'll see **"Drag a box around the size chart"**
3. **Click and drag** to draw a box around the size chart area
4. Adjust the box using the resize handles if needed
5. Click **Apply** (or press Enter)
6. The extension analyzes the cropped area and shows your recommendation

Size Recommendation Card:

- Recommended size with confidence percentage
- Why this size fits your measurements

- Alternative sizes (e.g., "M for a snug fit" or "L for a relaxed fit")

Warning Cards:

- If your profile measurements seem unusual, you'll get a friendly heads-up
- If you're not logged in, you'll be prompted to connect your account
- **No DressApp button visible?** Refresh the page and wait a few seconds for the extension to load.
- **"No clear match" message?** Try drawing a tighter box around just the size chart area.
- **"DressApp was just updated"?** Refresh the page to load the latest version.
- **Permission requests?** The extension may ask for permission to read the page - this is normal and required to analyze size charts.

The extension works on most e-commerce sites, including:

- SHEIN
- AliExpress
- Zara
- Asos
- H&M
- And many more!
- Your body measurements are stored securely in your DressApp account
- The extension only reads size chart data from product pages
- No personal shopping data is shared with third parties
- You can disconnect the extension anytime from your DressApp profile

Step 10: Subscriptions, Tiers, and Prepaid Credits

Manage your subscription limits and purchase extra AI styling credits:

1. **Monetization Tiers: Free Plan:** \$0.00 / month. Stores up to 150 closet items. Includes 10 free daily AI credits (which expire after 30 days). You can expand your closet capacity by sharing your invite link (+10 clothing slots per friend registration, up to a maximum limit of 1000 items). **Manager (Pro) Plan:** \$4.99 / month. Stores unlimited closet items and includes unlimited daily AI operations. Comes with a 14-day free trial and a 50-credit initial allocation. **Professional (Business) Plan:** \$9.99 / month. Designed for professional stylists, containing all Manager features plus support for creating ad campaigns in the feed. Comes with a 30-day free trial and a 300-credit initial allocation.
2. **Prepaid Credit Packs:** If you run out of credits, you can purchase additional packs to prevent service interruptions: **10 credits pack:** \$1.99 **25 credits pack:** \$3.99 **50 credits pack:** \$7.99 **100 credits pack:** \$15.99 **Custom amount:** Purchase any custom quantity (minimum amount of 5.00 ILS). **Note:** Paid credits never expire, whereas daily free credits expire in 30 days. The system automatically consumes your oldest expiring free credits first before using paid credits.
3. **Localized Local Payments (Atzmai Gateway):** For users in Israel, you can pay easily in ILS (Shekels) or USD using **Bit** or Israeli credit cards. Supports single purchases or recurring direct debit subscriptions.

4. **Automated Receipts & Invoices:** After any purchase, you will receive a thank-you email with official invoice and receipt PDFs generated from the gateway.
-

3. Quick Troubleshooting & Tips

- **Free Tier Closet Capacity:** Free accounts store up to 150 items. Upgrade to **Pro** (\$4.99/month) or invite friends (+10 extra slots per friend invite) for unlimited space!
- **Voice Typing Not Working:** Make sure microphone permissions are allowed in your browser settings (Chrome or Safari recommended).
- **Background Removal:** For the cleanest photo cutouts, photograph clothing against a contrasting wall or bedsheet.
- **Wardrobe Import Issues:** Make sure you're using a desktop browser (Chrome or Safari recommended). The import feature doesn't work on mobile devices.
- **Shopping Assistant Not Working?** Try refreshing the page. Make sure you're logged into your DressApp account and the extension is enabled in your browser settings.
